

To Assemble Your Activities:

- Copy the number templates on office paper and the number/number words on cardstock.
- Place a magnet on the back of each number and number word card. I use magnetic business cards with an adhesive back. These magnets can be cut to fit the cards.
- You will need small manipulatives for counting. I use small erasers which I purchase online from Oriental Trading. Decorative glass beads with a flat bottom would work too. The glass beads can be purchased in the floral department at any craft store. Adhere magnets on each manipulative.

- You will need popsicle sticks to make the tallies. Adhere a magnet on one side of 4 popsicle sticks. On the 5th stick, place a Velcro dot in the center. Place a Velcro dot in the center of one of the popsicle sticks with a magnet.
