Directions

You will need two players to play the game. Each player will need approximately 10 colored chips (each player will have their own color). Players take turns reading a sight word on the board and covering the word with their chip. The first player to have four chips in a row either horizontally, vertically or diagonally wins the game. Players need to be aware to block their opponent while still trying to get their 4-In-a-Row.

Thank You!
